

# sprint™

## SINGLE POINT INFLATION SYSTEM

## SIMPLICITY REDEFINED

The Cabrinha bow kites ease of use has reached a whole new level with the addition of Sprint™ - our unique single point inflation system. Just pull the kite out of the bag, hook the pump to a single valve and inflate the entire kite to the desired pressure. If you'd like to roll up the kite with only the leading edge deflated, a set of lock off clips will ensure that the struts stay inflated.

### INFLATE YOUR KITE IN 3 EASY STEPS

Step one: Connect the pump hose to the one way Airlock valve.

Step two: Inflate your kite and clip off the struts.

Step three: Get on the water!
